## **DUPLEX COATINGS**

Many specifiers are familiar with one type of corrosion protection system or another, but few realize the intrinsic value of utilizing two together, called a duplex system. A duplex system is formed by painting or powder coating over hot-dip galvanized steel. Used for decades as a means to enhance corrosion protection, the synergy between the two systems provides protection far superior to either system used independently. Eagle Industrial Solutions is experienced in painting over galvanized materials. Eagle Industrial Solutions can provide many types of topcoats. Our experienced staff understands the specialized processes involved with topcoating galvanized steel which guarantees superior protection and long life.

STRENGTH YOU CAN RELY ON, SOLUTIONS THAT LAST.

Eagle Industrial Solution is a Kentucky based manufacturer of waste and recycling equipment for collecting, processing and transporting recyclables and solid or liquid waste. Specifications subject to improvement without notice. Equipment displayed should be operated by properly trained personnel. Photos used in the literature are illustrative only. We reserve the right to make changes at any time without notice. Information contained within this literature is intended to be the most accurate available at time of printing. Operators should become familiar with OSHA, ANSI and any other applicable standards or laws for using this equipment. Improper use, misuse, or lack of maintenance could cause injury to people and/or property. Train your people so they know what they are doing and can operate equipment safely and efficiently.
